**EFFECT OF THE INVENTION**

---

It is clear also from the statement of the column of (EFFECT OF THE INVENTION).

[0005]Morita and others of the artificer of the above-mentioned patent application has reported the effect of the EPA free object in the osteoporosis model which gave low Ca foods to the ovariectomy rat (Japanese Society for Bone and Mineral Metabolism magazine of volume [ 9th ] 3 No. 307-page 1991). Although it has suggested in the report that EPA has an osteogenesis promotion operation on specific conditions in an experimental model, there is actually no reference about a therapy.

[0006]However, EPA currently used with the advanced technology of these two affairs is a free object, and there is neither use in the form of other derivatives, such as a salt, ester, amide, nor an indication of the usefulness, and it is unstated in any way also about the validity on clinical. It is known that the free object of EPA has a strong membrane stimulus, and we are anxious about side effects, such as ulcer inducement, on clinical.
